**ESTABLISH CENTRALIZED LAND INVENTORY DATABASE**

Objectives and Achievements	In Progress
<p><b>Objective: Establish a central State land inventory and require all agencies to use it for the management of the State’s real property portfolio.</b></p>	<p>This objective was transferred from DHSS to OMB, Office of State Planning Coordination in late July 2018.</p>
Next Steps (Future Activities)	Challenges (Issues and Risks effecting your effort)
<p>We need to create a Business Case with DTI to create a centralized relational database and geospatial component to maintain accurate and up-to-date data on the assets owned and managed by the State of Delaware. This database is envisioned to permit each agency the autonomy to input and update their land inventory data but store it centrally with all other agencies so it can be queried and provide management the best information for decisions regarding these properties.</p>	<p>The biggest challenge will be funding to create the database and agency interface to permit data input. Requirements gathering will need to be all inclusive and then we’ll have to work with DTI to create the relational database, data input interface, and geospatial components working on the State network.</p>
