**ESTABLISH CENTRALIZED LAND INVENTORY DATABASE**

Objectives and Achievements	In Progress
<p><b>Objective: Establish State land inventory</b></p> <p><b>Establish a central State land inventory and require all agencies to use it for the management of the State’s real property portfolio.</b></p>	<p>OSPC has developed a scope of work to undertake this objective. We will be contracting with IPA in the next quarter to gather all the stakeholder agencies and develop a path forward. Once the path forward is developed OSPC will work with the agencies and DTI to move forward a business case to address the solution.</p>
Next Steps (Future Activities)	Challenges (Issues and Risks effecting your effort)
<p>We need to create a Business Case with DTI to create a centralized relational database and geospatial component to maintain accurate and up-to-date data on the assets owned and managed by the State of Delaware. This database is envisioned to permit each agency the autonomy to input and update their land inventory data but store it centrally with all other agencies so it can be queried and provide management the best information for decisions regarding these properties.</p>	<p>The biggest challenge will be funding to create the database and agency interface to permit data input. Requirements gathering will need to be all inclusive and then we’ll have to work with DTI to create the relational database, data input interface, and geospatial components working on the State network.</p>
